Hi Lisa,

Please see the below to dip your feet regarding Lane Plating and the attached. One document is the Conflict Resolution request that has been approved, and the other is the list of issues that some community groups shared to HQ regarding multiple site. We are working on our answers to each issues. I worked on Lane today, and I can share those draft answers in my next email.

Thanks,

-Ed-

Subject: Lane Plating Call with CPRC and Region 6

Hi Helen,
Below is a summary of the Lane Plating call yesterday afternoon.

Yesterday afternoon, CIPIB met with Gina Cerasani, Conflict Prevention and Resolution Center and Edward (Ed) Mekeel, Region 6 Community Involvement Coordinator for the [Lane Plating Works, Inc](#) Superfund site in Dallas, Texas to discuss neutral facilitation services emphasizing the need to begin building trust in the community. Requested facilitation support focused on community interviews in support of a situation assessment as well as the Community Involvement Plan; meeting facilitation/mediation; and CAG formation very much supported by Region 6 management. Carl Edlund very recently told Ed that CAG formation is a priority. The first community

meeting on November 13, 2018 had close to 200 people and was very contentious and included protestors. Next steps include authorizing technical direction under the Superfund Just in Time task order to begin the selection process of a neutral facilitator. This could take between one to four weeks depending on which selection process Region 6 chooses to follow. Technical Assistance for Communities-TASC was also discussed and technical assistance needs assessment questions will be incorporated into the community interview questions.

Ed referred to the CAG guidance and specifically the local government model, as well as questions about city council representatives selecting CAG members. I said I wasn't aware of this model and we all agreed this would not be a recommended approach.

Let me know if you have questions.
